

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Applicant(s) : Andrew Hausman Serial No.: 10/643,663  
For : COMPLIMENTARY TRADING OF INTEREST  
Filed : August 19, 2003 Examiner: Samuel Weis  
Art Unit : 3693 Confirmation No. : 5760

**SUMMARY OF MARCH 4, 2008 INTERVIEW**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

SIR:

This summarizes the interview between Applicant's Representative and Examiner Weis on March 4, 2008.

Applicant's Representative discussed an example of where the invention may be used. As discussed in paragraph [0008] of the application, a trader associated with a first currency, e.g. U.S., places an order for a stock offered in terms stated in another currency, e.g., Euros. The method of claim 1 provides terms for a proposed transaction in at least two currencies. In the example, the terms of the proposed transaction would be a foreign exchange ("FX") conversion of the U.S. dollars to Euros.

Applicant's Representative discussed differences between claim 1 and Potter et al., and a proposed amendment to claim 1. No agreement was reached with the Examiner.

Respectfully submitted,

Date: March 19, 2008
